WEBSITE DEVELOPMENT

We do undertake to provide the Website development to suit the needs of the customers. Basically the website for a institutions or an organization is not a license and its mainly on the promotional aspects and a getting to know kind of thing where in the end users will get to know about you and will call or ping or connect for their requirements by visiting your website which will have the complete details and in a way the same should be reflecting and giving the reader a feeling of physically visiting your premises in witnessing the items he requires and in the bargain and on understanding fully the usage and getting to know the meeting of the readers needs bid for the purchase is the kind of feel the website should be giving. Also it should create the trust, integrity

and the belief, confidence for the reader which is most important and all that need to be meticulously articulated through our words, images and flashes etc, to project, provide the feel and the acceptability for the reader to order / bid for the item from our gallery which we provide them on imagination through our words and images.

We Sulabh Softech Private Limited will provide the solution with completeness including the content which will be the key to take through the reader for the satisfactory levels and without shifting the readers thinking to other sites and to zeroing on their decision. Therefore Sulabh Softech Private Limited will play an important roll which will be key and act as a pivot and bring in the orders.

The product on Website will have the costing based on the

number of pages and the actual requirement such as flashes, images, content management, animation, video, photo gallery etc., etc., which can be arrived and derived from the discussion and understanding of the customer needs and the market responses on the products.

Sulabh Softech Private Limited provides online support 24 x 7 basis including server main tenance, domain registration, server space sharing etc., on a additional cost.
